```
school_information {  
    major = Electrical and Computer  
Engineering;  
    concentration = Software Systems;  
    graduation_date = May 2019;  
};  
  
/*
```

My technical interests include Cybersecurity and Computer Graphics and Animation I really enjoy the intersection of technology with other industries, specifically in the entertainment sector.

I'm actively involved in a lot of the things on CMU's campus. I really enjoy the being a part of the things that make CMU unique. I've been a head mechanic for buggy as well as being in charge of a booth. I enjoy being able to work on things that aren't always directly related to my field of study.

Outside of working with software, I enjoy film, playing video games, and keeping up with sports when I can. I've lived most of my live in Pittsburgh, but I like to travel and experience nature and National Parks. While I don't have a lot of experience doing so, I very much enjoy working with graphic design as well as 3D modeling.
